In order to attempt more accurately, consider the following suggestions while attempting the questions:

1. If you are not able to solve a question correctly or have doubts in your approach towards the solution, skip it for later.
2. Quickly revise the steps for avoiding calculation or casual mistakes.
3. Avoid guesswork.

Overall Preparedness Analysis

The below table represents the percentage of correct questions achieved at the analysis level.

Conceptual errors, for which you would require more reading and understanding of concepts.

Minor or careless mistakes, for which you would require a more composed and calm approach towards solving the question paper.

The topics marked in red need your immediate attention.

Time Management

Below table shows the time you spent in each section.

SECTION (GROUP)	TIME SPENT BY YOU (IN MINS)
DSA Stack Queue Part 1 Assessment (DSA)	7:14
Total time spent	7:14

Recommendations

1. It is essential for each aspirant to plan and schedule time for each section diligently. This is important to score well in each section and ultimately meet the cut-off.
2. This will also help you in attempting all the questions in each section and hence not missing the opportunity to score more.

Response Change Pattern

Below table provides the number of times you have changed your responses while answering the test and also the nature of those response changes.

SECTION(GROUP)	CORRECT TO INCORRECT	INCORRECT TO CORRECT	INCORRECT TO INCORRECT	CORRECT TO UNANSWERED	INCORRECT TO UNANSWERED	UNANSWERD TO CORRECT	UNANSWERD TO INCORRECT
DSA Stack Queue Part 1 Assessment (DSA)	0	0	1	0	0	5	5
Overall	0	0	1	0	0	5	5

It is suggested that guesswork should be avoided for any type of response changes. It has been observed that more often than not, guesswork leads to an incorrect response thereby inviting negative marks which in turn has an adverse effect on the overall rank. You must use your knowledge, observation and elimination skills to arrive at the correct answer.

Interpretation and Suggestions

1. Incorrect to incorrect response change:
You may need to work more on the concept level, in order to gain confidence.
2. Incorrect to correct response change:
At the first glance you were not very sure about the solution.
You must spend at least 1 minute per question and if you are not able to reach to the solution, you must revisit the question to enhance your score.
Perform this response change only when you are confident or have spotted a mistake in the solution of your first response.
3. Correct to incorrect response change:
You are not sure of the solution and have either applied a wrong concept or made a calculation mistake.
You need to practice more questions on the same concept.
4. Correct to unanswered response change:
You are not sure of the solution
You need to practice more questions on the same concept.
Perform this response change only when you are not confident of your solution.
You must try to spend at least 1 min before leaving it unanswered.
5. Incorrect to unanswered response change:
Your judgment of avoiding negative marks is right.
You must try to spend at least 1 min before leaving it unanswered.
